Equipment/Fitting Layout		
No.	Name	Description
1	Return	Return Hot Water Ø62
2	Supply	Supply Hot Water Ø52
3	Flue	Ø305
4		
5		
6		

**Notes:**

Nominal power:	300	kW
Operational temp.:	70-90	°C
Efficiency factor of the heating system:	80-90	%
Operating pressure of the heating system:	3	bar
Diameter of connection pipes:	50	Dn
Size of the flue pipe for the boiler:	500	Ø
Weight of the boiler (net):	1450	kg
Weight of the pellet reservoir (net):	50	kg
El. capacity (max):	3.5	kW
Voltage of the electricity connection:	380	V
Average theoretical consumption of pellets per day:	0.01x1x24	kg/m <sup>2</sup> /h

**Manufactured by:**
